For APN 659-24-009 associated with 4211 Chaboya Rd, - there is record of a Building violations for a new antenna tower built without permits several times.

Looks like the Building Dept. denied legalizing it both times and it was removed from the property.

File numbers to reference through the building dept. is 1993-31448-00 evaluated in June 15, 1993., and VIO-1688 evaluated in August 31, 2009.

There are no current application on file for antenna structures on either of the two APN's listed below.

Both of the listed APNs have a long list of old Building Dept. violations for buildings built without permits.

Since you have created an Acella account you are welcome to do a search for the records associated with each site – under the search bar -simply type in the APN number or address – and all permits and recorded violations associated with those parcels will show up.

I was trying to understand all the cases, but some data is missing in our new database. You may want to give Erica Prado a call. She is the Building Permit technician that specifically works on Building Dept. violation cases. Erica can be reached at (408) 299-5707, Erica.Prado@pln.sccgov.org – also ccd on this email chain.

Thanks,

Colleen

Subject: Seeking updated verification: another new FCC antenna construction at APN # 659-24-009

Updated reference APN# 659-24-009

Dear Colleen & James,

This morning, the Federal Communications Commission received a certification that a new Antenna structure has been constructed near the coordinates we previously inquired about.

As we amend a new updated Complaint with both the FCC and the County, we respectfully ask if you could please verify whether any permits for such a facility have either been filed, approved, or denied for **APN # 659-24-009 (4211 Quartuccio Wy)** or the neighboring property **APN # 659-24-004** (3937 Chaboya Road).

We respectfully to ask to check on both properties, since the FCC allows some tolerance for the coordinates below make difficult to distinguish exactly which property the antenna has landed on.

Site Location: 37-19-40.8 N 121-45-33.3 W (NAD 83)

Site Location: 37-19-41.0 N 121-45-29.5 W (Converted to NAD 27)

Google map link corresponding to Coordinates: <https://goo.gl/maps/KYuDwmoKNfx>

Please be advised we have filed and now amending a complaint, listed under VIO19-00153, to include updated information also being sent to the FCC. Your verifications whether permits exist or not for the above listed APN parcels is needed for reference.

For your reference, below is the direct link for the new application as listed on the FCC's website, showing as 'Accepted for Filing', followed below by the precise coordinates listed for the Antenna. (Note, Section I / Q5 refers to the FCC Construction Permit for the new location; and Section III, Certification signed by Sharai Guel stating the structure was built on 03/18/2019) .

Thanks in advance for any information. Please let me know at your earliest convenience if more additional information is required on our part.

Respectfully,

Manuel J. Martinez
